

# Sustainability Support Services (Europe) AB

*ISO Certified Chemical Regulatory Compliance Services & Solutions*

---

3<sup>rd</sup> April, 2015

As a part of the only representative's obligation to update all its client companies on their various obligations related to compliance with the REACH regulations and other regulations that complement REACH and are into effect in Europe; we would like to bring to your kind notice that a **new regulation (Cosmetic Regulation - EU/1223/2009)** has already come into force within EU countries **since 11<sup>th</sup> July 2013**.

As per the requirements of the regulation, companies who are exporting chemicals to Europe, specifically for cosmetic application, will have the obligation to provide the chemical product safety report (**CSR**) of the exported chemical to the European buyer. Manufacturers will have to follow specific requirements in the preparation of a CSR, prior to placing a product on the market. Certain European cosmetic brand owners might themselves prepare the CSR; but the costs are very high and in certain cases, non-European manufacturer might have to share the cost. Sometimes, the brand owners might require the manufacturer of a chemical, used in the cosmetic product, to provide them with the safety report.

Please note that **SSS has the technical expertise** to help your company do the same at the **most competitive costs**. Detailed information on the regulation has been provided in the attached **factsheet** for easy reading.

We shall be happy to help you with **compliance assistance services** required for the above regulation.
